A Faster Migration to AWS

The Assessment That Pays for the Migration

Legacy licensing and infrastructure decisions often carry a higher cost than organizations realize. The AWS Optimization and Licensing Assessment (OLA) gives a clear, data-backed picture of what's actually being used, and what it would cost to run the same workloads on AWS. NuSummit uses the assessment findings straight into migration and delivery, so the OLA isn't a standalone report but the first stage of one continuous engagement.

What the OLA Delivers

An inventory of actual compute, storage, and licensing usage, not estimated usage.

The lowest-cost EC2 instance size and type for each workload.

Average savings of 45% on Microsoft SQL Server licensing and 77% on Windows Server licensing after migration.

A migration and licensing strategy specific to your environment.

Why NuSummit

Assessment and delivery sit with the same team, so nothing gets re-scoped or re-discovered between the two.

Findings feed directly into NuSummit's Cloud Migration Factory: standard designs, automation, and security guardrails carried through migration, production, and modernization.

No handoff gap between what the assessment recommends and what actually gets built.

From Assessment to Production with NuSummit

Scope

NuSummit works with you to identify which workloads to assess first, based on cost exposure, licensing risk, or upcoming renewal dates.

Collect

Utilization data is gathered using AWS Migration Evaluator and NuSummit's own discovery tooling, giving a complete picture without relying on estimates.

Analyze

Licensing and cost data are modeled against multiple optimization scenarios, so the recommendation reflects trade-offs, not a single fixed path.

Plan

Assessment results become a business case and a migration roadmap, with the right approach including Rehost, Replatform, Repurchase, Refactor, Retire, or Retain, mapped to each workload.

Migrate and Modernize

NuSummit takes the same roadmap into execution, no new discovery phase, no repeated data collection. Migration runs in waves, each treated as its own mini project, with performance benchmarking and cost optimization built into every stage after go-live.

About NuSummit

NuSummit is a global technology leader in AI-led digital transformation, specializing in applications, data, analytics, cloud, and cybersecurity. With over 300 clients worldwide, including 22 Fortune 500 companies, NuSummit supports organizations across industries. Our core expertise lies in banking, insurance, and capital markets, where we offer specialized solutions for these sectors.

With over two decades of experience and 3,000+ professionals, we deliver AI-driven, end-to-end solutions that integrate advanced cloud infrastructure and cybersecurity. Certified to top industry standards and backed by a robust partner ecosystem of hyperscalers and niche innovators, NuSummit is a trusted partner for secure, impactful digital innovation.
