The Strategic Shift from VMware to AWS for Business Efficiency

The Need for Change

- VMware licensing changes have raised costs and cut flexibility.
- Subscription pricing makes budgeting harder.
- Expiring ELAs, hardware refreshes, and lease expirations are forcing early decisions.

The AWS Solution

AWS offers four paths, including Relocate to Amazon EVS, Rehost to EC2, Replatform to containers or managed databases, and Refactor to cloud-native services.

Amazon EVS runs VMware Cloud Foundation inside an AWS VPC. IP addresses, HCX, vMotion, and existing runbooks carry over.

Nutanix Cloud Clusters (NC2) and Red Hat OpenShift (ROSA) are also available on AWS.

This allows up to 66% infrastructure savings, 60% time savings via automation, and 43% faster time to market.

Why NuSummit

NuSummit is an AWS Advanced Consulting Partner.

Our Cloud Migration Factory applies standard designs, automation, and pre-configured security guardrails to every wave.

20 to 50% of enterprise application portfolios follow repeating patterns. We standardize and automate them instead of reworking each one manually.

Our five-stage delivery model includes Discovery and Assessment, Design and Planning, Migration, Production, and Modernization.

Workloads move in waves, low complexity first, to build confidence before harder migrations.

The AWS Optimization and Licensing Assessment (OLA)

1

Complimentary, no-obligation review of compute, storage, and licensing.

2

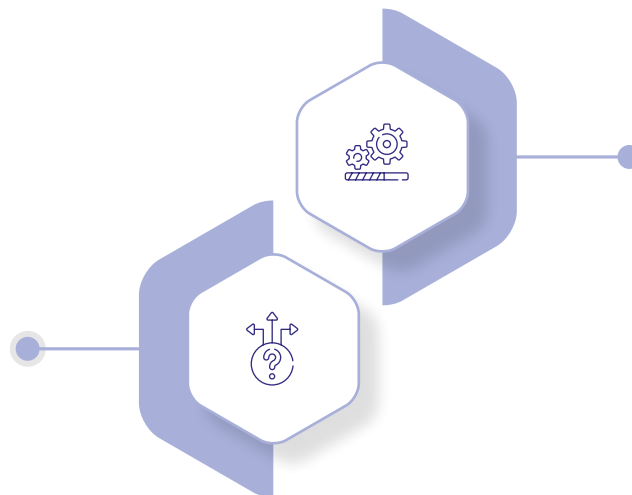

Provides right-sizing recommendations, a licensing strategy, and a migration roadmap based on actual usage.

3

Average savings include 45% on SQL Server licensing and 77% on Windows Server licensing.

Migration Methodology

The OLA and discovery findings decide which migration option applies to each workload.

Each wave runs as its own mini project. Complexity stays contained, and progress stays measurable.

Post-Migration Support

Performance benchmarking and stabilization at go-live.

Cost optimization including right-sizing, commitment plans, and storage cleanup.

Security governance aligned to industry best practices.

Ongoing support past cutover.

Strategic Benefits

Lower TCO through right-sizing and licensing optimization.

Faster time to market once VMware constraints are removed.

Lower risk through a wave-based rollout, not a single cutover.

Access to 200+ AWS services, including AI/ML, at no extra upfront cost.

Next Steps

Schedule your complimentary assessment.

About NuSummit

NuSummit is a global technology leader in AI-led digital transformation, specializing in applications, data, analytics, cloud, and cybersecurity. With over 300 clients worldwide, including 22 Fortune 500 companies, NuSummit supports organizations across industries. Our core expertise lies in banking, insurance, and capital markets, where we offer specialized solutions for these sectors.

With over two decades of experience and 3,000+ professionals, we deliver AI-driven, end-to-end solutions that integrate advanced cloud infrastructure and cybersecurity. Certified to top industry standards and backed by a robust partner ecosystem of hyperscalers and niche innovators, NuSummit is a trusted partner for secure, impactful digital innovation.
